AI AUTOMATION & PRODUCT ENGINEER

Akash Gajbhiye

Nagpur, India · aakashbuildss@gmail.com · Portfolio · GitHub · LinkedIn · X / Twitter

SUMMARY

AI automation and product engineer with hands-on experience building and maintaining recruiting systems, API integrations, AI workflows and a paid Android app. Works across TypeScript, Next.js, Node.js, Python and Supabase, with a focus on reliable workflows, access control and human review.

EXPERIENCE

AI & Digital Operations, F5 Hiring Solutions — REMOTE

Jun 2026 to Oct 2026

US recruiting company · Owned and improved production systems used by recruiters, staff, candidates, clients, and partners

- Rebuilt recruiting workflows across candidate intake, document handling, AI scoring and client submission; fixed upload and download failures and trained recruiters on the repaired process.
- Redesigned candidate onboarding to score only the new profile rather than the entire pool, reducing approximately 160 model calls to one per new-candidate run.
- Built and validated role-specific application forms, weighted scoring rubrics and admin review flows supporting 93 role definitions and 85 public careers pages.
- Owned connected staff and client applications, fixing 24 workflow issues across attendance, night shifts, leave, onboarding and permissions; repaired a resume export that exposed internal notes.
- Built and shipped a Next.js/Supabase referral platform with partner signup, referral intake, earnings and payout views, admin review, audit logging and row-level security.

Independent AI & Automation Developer — FREELANCE

2025 to Jun 2026

Shipped AI products and automation builds, solo, end to end

- Shipped and maintained an Android AI product with secure billing and production support; built additional voice-agent, outreach and job-discovery workflows.

Web3 Protocol Tester & QA Researcher — FREELANCE

2024 to 2025

Blockchain · DeFi · Protocol Testing · Bug Reporting

- Tested early-stage Web3 and DeFi protocols, covering testnet validation, wallet flows, transaction edge cases, and bug reporting.

PROJECTS

PDF Editor & AI: Anti-Gravity ↗ — LIVE ON GOOGLE PLAY

React · Capacitor · TypeScript · Supabase · Gemini API · Node.js · Google Play Billing

- Built and maintained a Google Play app with 2,300+ installs and 24 paid lifetime sales across 11 countries (October 2026).
- Implemented billing and purchase verification using Google OAuth, HMAC validation, Play Integrity API and Google Play Billing; resolved a production premium-access failure caused by a database column mismatch.

CareerPilot AI ↗ — LIVE · VERCEL

Next.js · TypeScript · Supabase · Gemini API · SerpAPI · n8n

- Built a job-discovery workflow using SerpAPI search, Gemini scoring and n8n scheduling; stored ranked jobs in Supabase and displayed tailored application drafts in a Next.js dashboard.

SKILLS

AUTOMATION
n8n · Workflow Automation · REST APIs · Webhooks · OAuth · Cron Jobs · Unipile API

GROWTH & GTM
Clay · Lead Scoring · Outbound Automation · Data Enrichment · GEO · AEO · SEO · Google Ads · Referral Loops

AI & LLM
Claude API · Gemini API · LLM Evaluation · Golden Datasets · Regression Testing · Structured Outputs · Prompt Engineering · AI Agents

ENGINEERING
TypeScript · JavaScript · Python · React · Next.js · Node.js · Tailwind

DATA & SECURITY
Supabase · PostgreSQL · Firebase · Google Sheets · HMAC · RLS

TOOLS
Git · Vercel · Claude Code · Playwright

RECRUITING SYSTEMS
ATS Workflows · Evidence-based Scoring · Recruiter Review

EDUCATION

Sardar Patel Institute of Technology
B.E. Electronics Engineering
University of Mumbai

Candidate Pre-screen LLM Evaluation PRIVATE GITHUB

`Python · Gemini API · Golden Dataset · Deterministic Evaluation · Structured Outputs`

- Built a 25-case evaluation harness covering hallucination traps, missing evidence, contradictions, matched bias cases, Hinglish and reject-versus-review decisions.
- Added input-leakage protection, field-level grading, bounded retries, resumable runs and token, latency and cost tracking; verified with 40 tests. Completed a 25-case v3 baseline and a partial 11-case v4 regression run.

MORE BUILDS

Clay GTM Enrichment Pipeline ↗ CLAY BUILD

`Clay · Claygent (AI Qualification) · Waterfall Enrichment · List Health`

- Built a seven-provider email enrichment waterfall and AI qualification workflow; increased email match coverage from approximately 20% to 75% on the working prospect list.

AI Mail: Universal Email Client ↗ FULL-STACK AI

`Next.js · NextAuth · Gmail REST API · Gemini AI · Supabase · TypeScript`

- Built Gmail inbox sync, send/reply/archive and threading; fixed OAuth token exposure by moving session logic server-side.

LinkedIn DM Automation ↗ N8N WORKFLOW BUILD

`n8n · Unipile API · Google Sheets · Webhooks · JavaScript · Automation`

- Built six outreach workflows covering setup, connection requests, acceptance polling, follow-ups, reply tracking and daily limits, with reply-stop logic and inbound webhooks.
